TO THE CLASS OF 1958

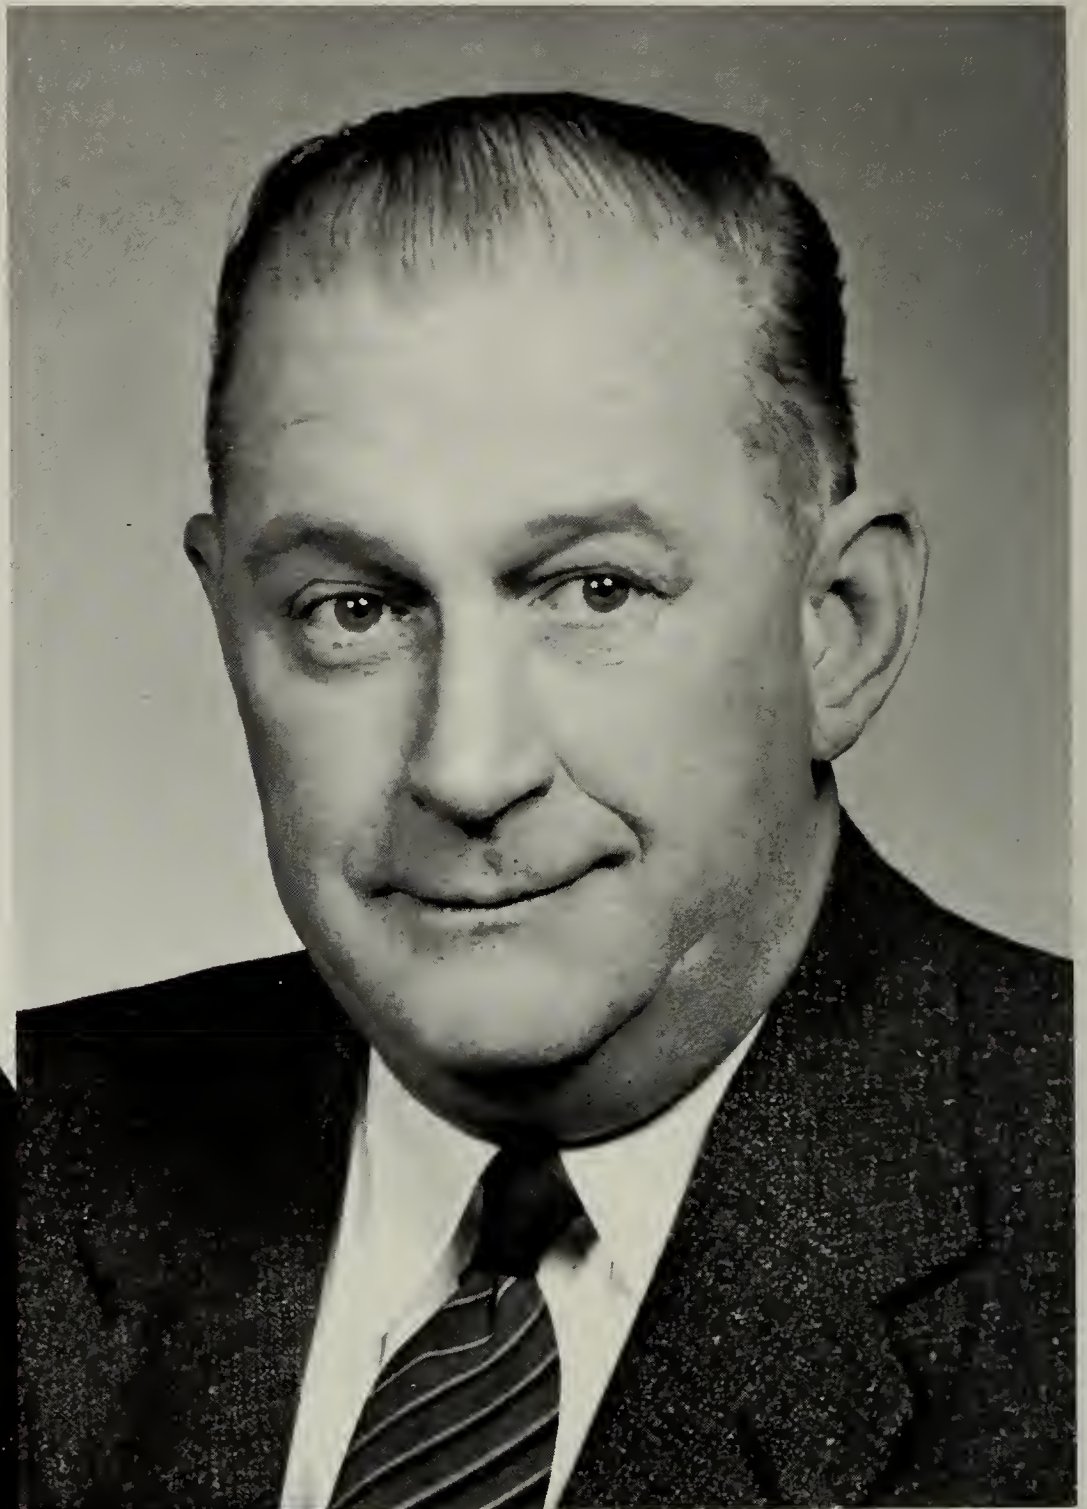

"When a resolute young fellow steps up to the great bully, the world, and takes him boldly by the beard, he is often surprised to find it comes off in his hand, and that it was only tied on to scare timid adventurers."

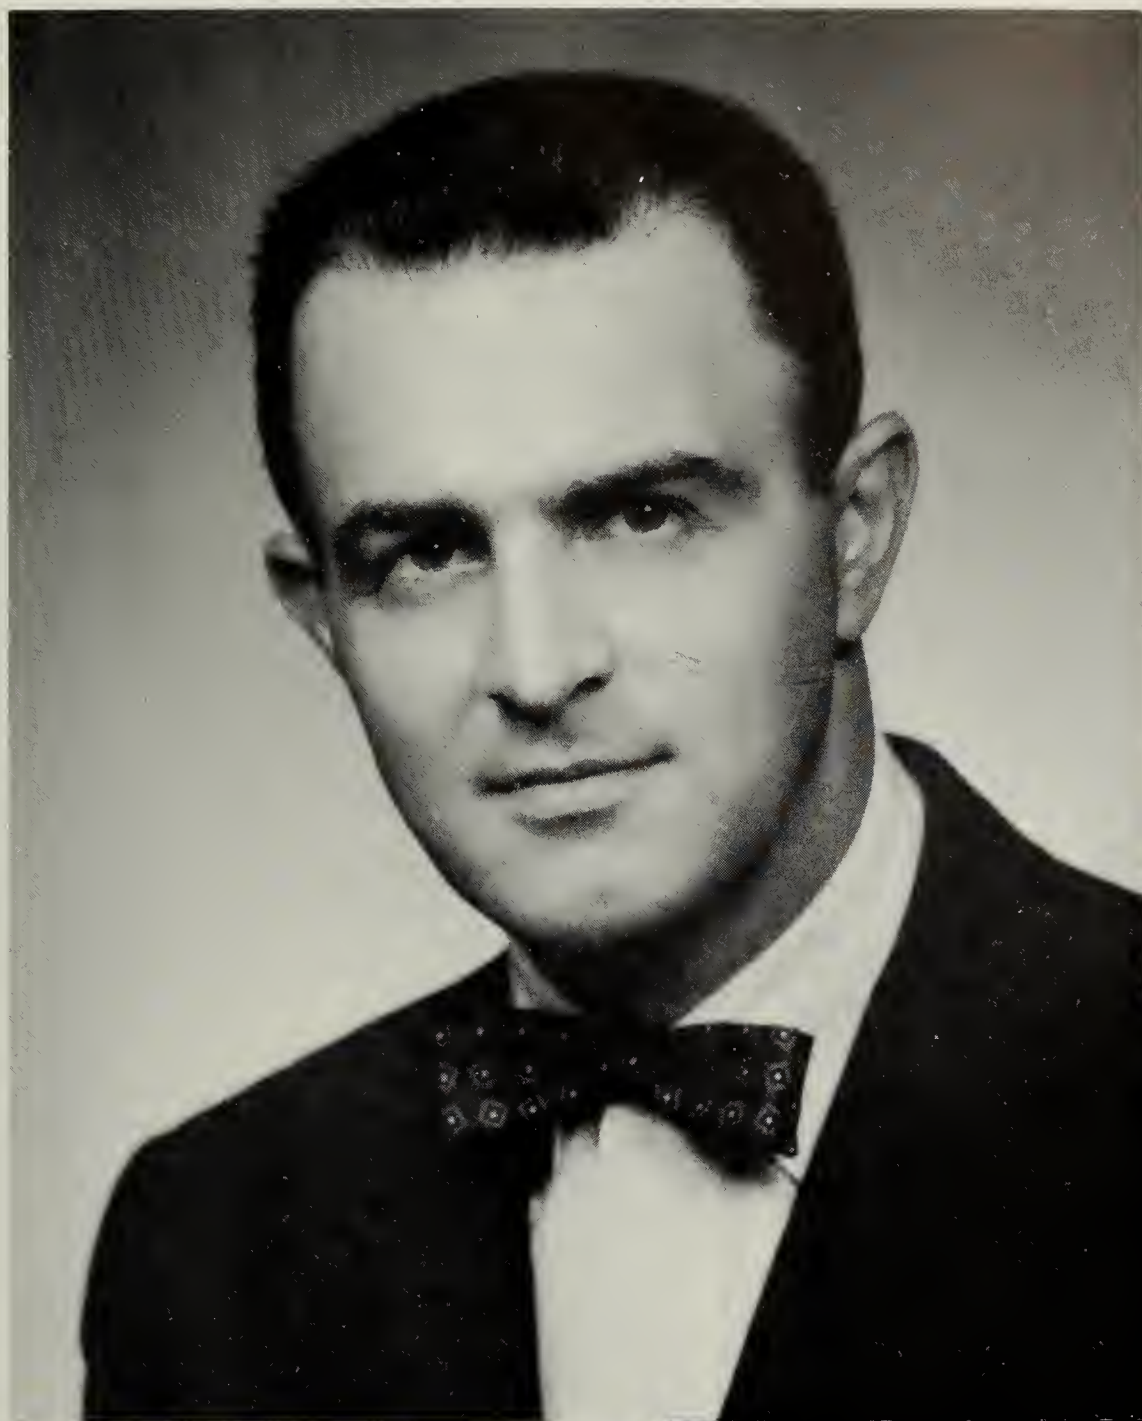

These words were written more than one hundred years ago by Oliver Wendell Holmes. They applied then and they apply with even greater intensity today. We of the institute hope we have given you the tools with which to face the world. You need now only to take the "great bully" by the beard. Whether it will come off will depend upon the intensity of your effort to remove it. Your faculty cares what the results of your effort will be and will continue to care in the years to come.

The results of your efforts will play a very important part in the future of your Alma Mater. We depend upon your success in your every day life - a life we are sure will reflect honor on those who guided your early footsteps.

I am sure the Class of 1958 will not fail in its obligations. To all of you my sincere congratulations and best wishes.

Dr. John E. Foster, President

The class of 1958 is proud to dedicate its yearbook to Professor Anthony J. John. In this small measure we wish to express recognition to Professor John for his many diligent efforts in behalf of the school, the student body, and the senior class in particular. To be a success in one's avowed vocation is exemplary in itself but what is needed today in our society is a moral integrity, an apostle of the righteousness and devotion to his fellow man. Professor John is a man of these high ideals who lives by them daily and in this way has contributed to the increased prestige of New Bedford Tech.

Members of the team—Jahn Murphy, Dale Sylvia, Eddie Sylvia, Barbese Voutsinas, Don Lucas, Gordon Helme, Tom Viera, Coach Clautier, Jim Lover, Eddie Rase, Pete Anthony, Dave Caakley, Craig Proctor, Struglia, Tam Brawn, Don Costa, Gil Babcock, Bob Cazimeiro, Milt Oliveira, Don Moriarty, and Al LeClair.

This years Tech soccer team boasts the best record in the last four years with 7 wins, 2 defeats, and 2 ties, with the outcome of one game still in doubt and under protest.

The feature attraction of the season consisted of Tech downing a previously unbeaten New England College on Nov. 2, at Henniker, N. H. to win the Daniel Webster Home Trophy. The contest was the feature attraction of Homecoming festivities for the civil engineering college located at the base of the White Mountains in New Hampshire.

Our soccer team has now brought recognition in the New England area to our school and is now one of the most highly rated soccer teams in New England. Hats off to our genial coach Edward Cloutier and the 1957-1958 New Bedford Tech soccer team.

SOCCER

BASEBALL

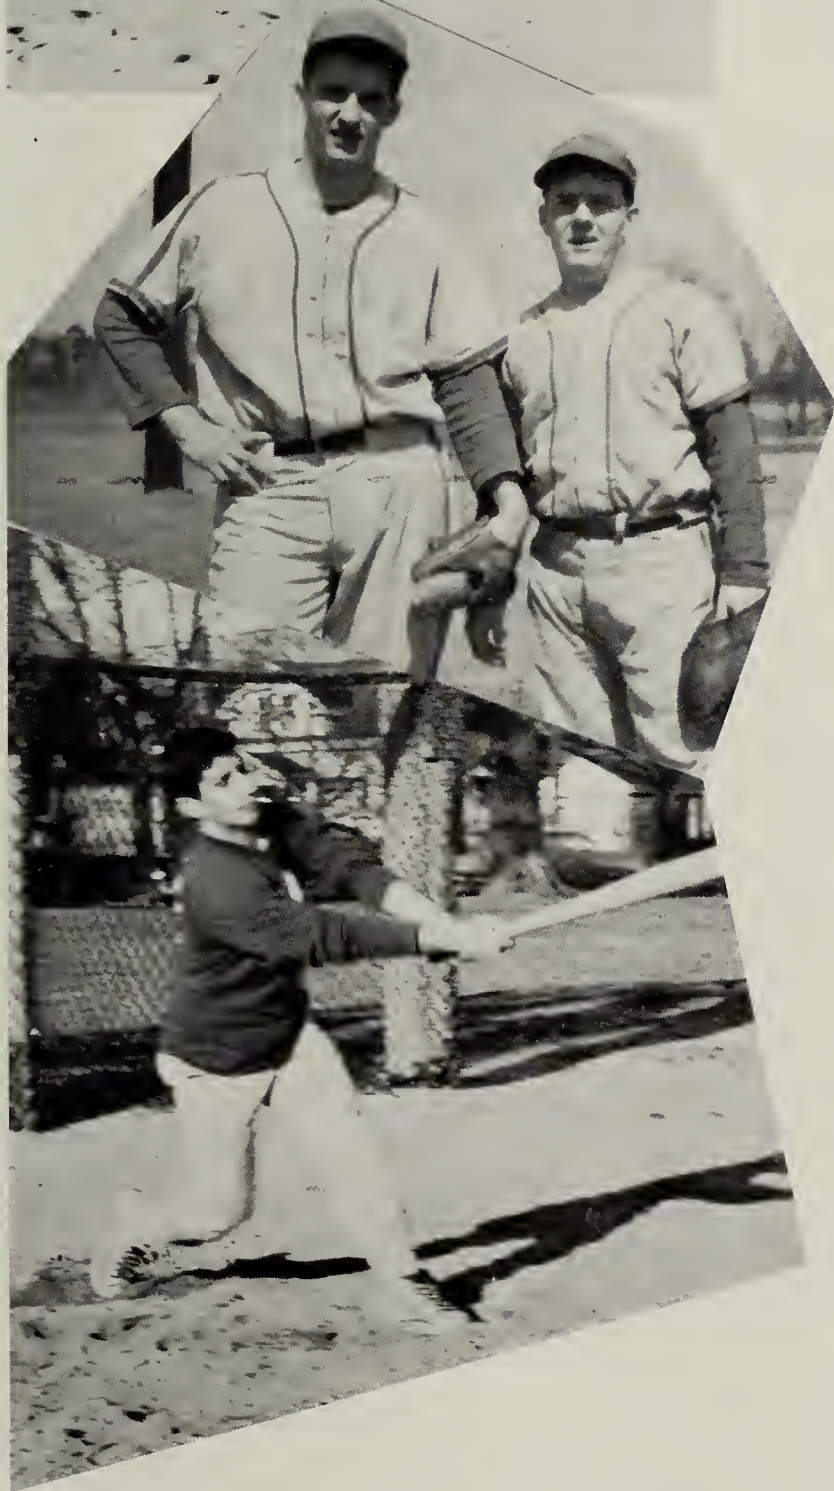

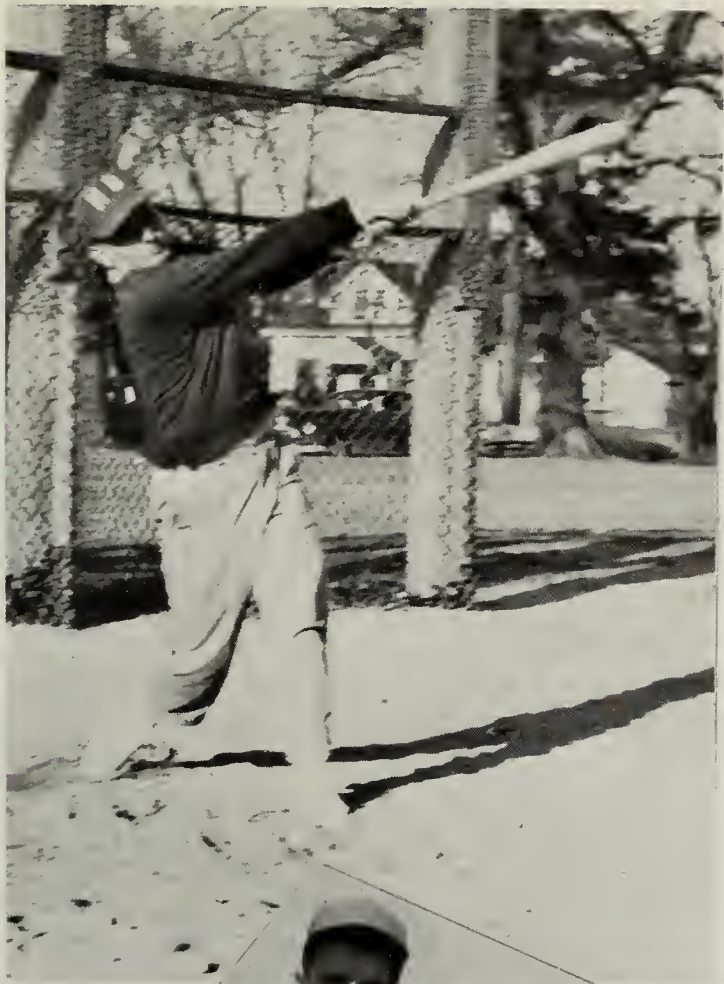

New Bedford Tech's Baseball team for 1957 was composed of; first row — Russ Wissman, Eddie Sylvia, Paul Marois, Walt Slocum, Angie Mello, Chris Hayes, Pete Inglese, and Dave Coakley, second row — coach Clarry Haskell, Tom Viera, Dan Loureiro, John Foster, Dick Arieta, Dick Motta, Ron Hall, and Bruce Boni.

Although our baseball team last season did not show too impressive a record with 7 wins and 8 losses, they met up with some extremely tough competition and their 7 wins were very impressive.

On the southern trip early in the season, they recorded impressive victories over the Prof. Institute at Richmond, Virginia, and the Campbell, North Carolina College. In league play they scored two decisive victories over rival Stonehill College of North Easton and recorded one victory over Durfee Tech of Fall River. Also, they twice defeated Curry College. This season they are looking forward to a very tough schedule which will be hampered by the loss of pitcher and first baseman John Foster as well as Angie Mello and Walt Slocum who were graduated last year.

TENNIS

The New Bedford Tech tennis team during the 1957 season was comprised of Danny Morrison, Gil Dutro, Bill Bicot, Ron Wade, Eddie Sylvio, Arnie Atkinson, and coach Louis Pochecho, as well as Marty Bendickson and Gus Diez who were absent when photo was taken.

Over the past four seasons, the New Bedford Tech tennis team has compiled a fantastic record of 31 wins and only 2 defeats. They have held the SNECC championship every year since its existence. Tech has not registered a tennis match defeat in 2 years and is looking forward to continue its winning ways again this year, although the team has lost the services of Donny Morrison and Gus Diez who were graduated last year.

Tech was represented in the NAIA tennis championship tournament by Gil Dutro and Bill Bicot, who were undefeated in season play. The tournament took place at the Lamar State College of Technology in Beaumont, Texas, where Bicot and Dutro competed against representatives of 31 other NAIA member colleges throughout the United States. Although they were defeated, they succeeded in giving the New Bedford Tech tennis team recognition throughout the nation.

CHEERLEADERS

The cheering squad this year was comprised of nine girls. They are; Rita Desjardins, Pat Pimental, Cynthia Vercellone, and Lucille Burnham (all freshmen new to the squad), head cheerleader Judy Morton, Joyce Dixon, Janet Clifford, Nancy Tripp (another freshman), and June Brownell.

This year the cheerleaders, led by their peppy head cheerleader Judy Morton, extended a diligent, successful effort in their attempt to increase school spirit at the various sports events throughout the year. The cheerleaders were particularly pleased with the increase in school spirit shown in sports competition and at rallies which they led this year.

This increase in school spirit was due largely to the enthusiasm with which these girls carried out their role of cheering our teams on to victory.

This year the NBIT basketball team again went all out and captured the SNECC championship for the second year in a row. They ended the season with a conference record of 9 wins and only 1 loss, defeating Durfee Tech of Fall River for the title.

The season included many road trips, the longest of which was the Montreal, Canada trip when Tech defeated Loyola College.

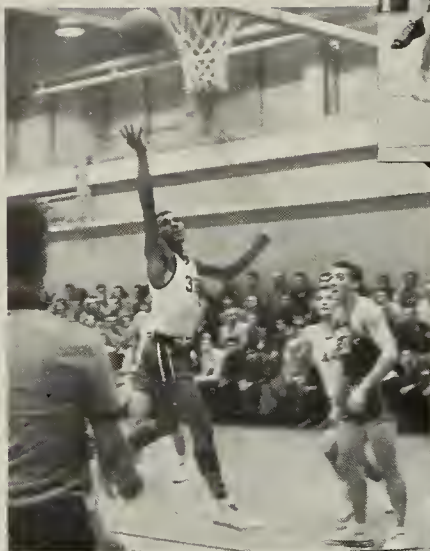

In season play, the overall record was 17 wins and 6 losses, excluding service teams, and of Tech's 6 losses, most were very close contests throughout. Tech lost its 1 conference tilt to Stonehill College of North Easton by a score of 71 - 70, without the services of Arnie Atkinson.

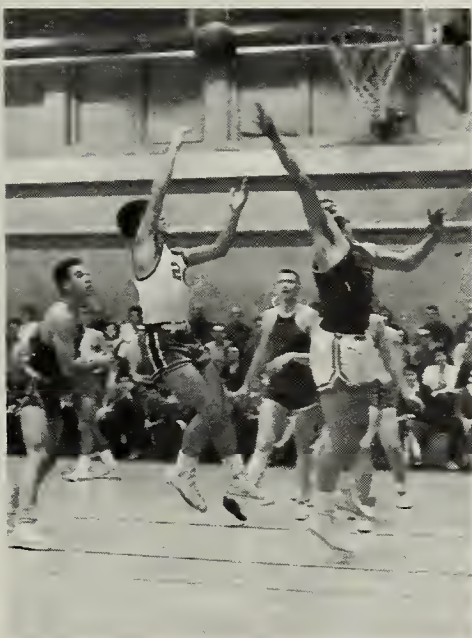

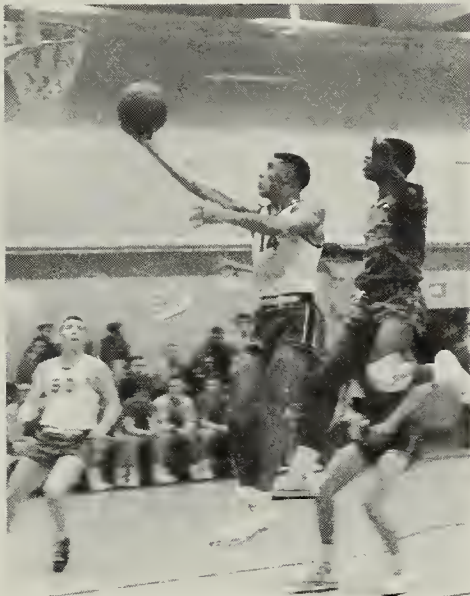

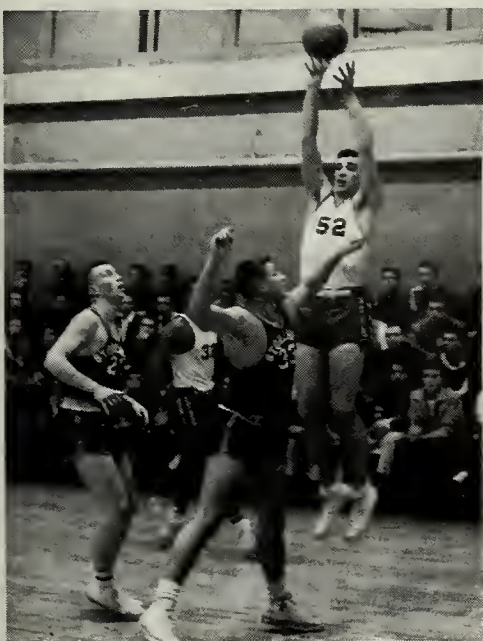

Tech participated in the NAIA invitational tournament at New Haven, Conn. and although they were defeated in the opening contest by the tourney winner, Assumption College of Worcester, by a score of 71 - 62, they took consolation honors by defeating strong Quinnipiac College of New Haven by a score of 77 - 66.

This year's squad showed much promise for future years in outstanding freshmen on the squad such as "Butch" MacNamara, Ted Jonas, Eddie Sylvia, Johnny Pina, and Bill O'Connell. Dale Stetson will be the only Varsity player lost through graduation.

The Student Council acts as a form of student government for the school. It is comprised of the four officers of each class who are determined each year by class elections. The primary functions of the Council are: to appropriate money for all scholastic activities, sponsor school assemblies, and the annual Welcome Back Bonquet which all students may attend free of charge. Bi-monthly meetings of the Council are held under the able leadership of Kenneth De Rego, Jr., President. Horvey Cunningham, Jr. acts as Vice President, Normo Cosey is Secretary, William Bicott, Jr., Treasurer, and Daniel Loureiro, Assistant Treasurer.

CAMERA CLUB

The Camera Club serves as an outlet for those interested in photography. It also is an organization which strives to interest others in a hobby which can be both recreational and practical.

Camera Club members this year have brought about a number of changes in the organization. The darkroom facilities were improved considerably with the rearrangement of equipment and installation of a new solution tray drain board. The usefulness of these facilities was increased when two modern safelights with changeable filters were installed.

The use of poly-contrast printing paper was introduced here this year, and proved quite valuable to the club.

Members of the club have done much of the photography work for the Fabricator and Tech Talk, and pictures by the members have appeared in various school brochures, the New Bedford Standard-Times, and other publications.

The increased number of entries in this year's Photo Contest shows the growing popularity of the contest and of photography itself. The school year of 57-58 has been one of considerable progress for the Tech Camera Club.

PHI PSI

Phi Psi opened the year with a total of approximately forty members representing four different foreign countries and the United States. Extensive renovations had been completed during the summer months to give the Fraternity a modern up-to-date frat house for the first full year. Our new bar was installed with the help of members of the fraternity; also a brand new Hi Fi set was purchased for the frat house to increase the enjoyment of the numerous parties. On October fourth our first dance was held at the frat house with a large attendance and much enjoyment. On October sixth, Beta Chapter held open house at the house from two to five-thirty. This affair was held for the benefit of instructors and their wives. Refreshments were served and the visitors were impressed with the many accommodations offered at the house. A Halloween party was held October twenty-ninth and the regular open house on October nineteenth for non-frat students was held at the Mickiewicz Club. The affair lasted until midnight and was continued at the frat house. On December twentieth Phi Psi held its White Christmas Dance at the New Bedford Country Club with the music of Ronnie Vince and his orchestra. On January fifth, 1958, the Standard-Times did a full page feature on "Life in a Frat House", which gave the reader a very good insight on fraternal life in the Beta Chapter frat house. The officers for the year were Normon Lopes, President; Bruce Gulbranson, Vice President; Ernest Poitros, Secretary; Richard Pepin, Treasurer; Ronald Mitchell, Chapter Editor. The frat house officers chosen in September, 1957 were Regis Forrest, house manager and John Donnelly, assistant.

Delta Chapter of Delta Kappa Phi has realized a long-cherished dream, that of acquiring a large Fraternity house to furnish the needs of the ever growing chapter here at New Bedford Institute of Technology. While Delta Kappa Phi is one of the oldest fraternities in America and is listed in the World Almanac and the Blue Book of professional fraternities, it has undergone a transitional change in that many of its members are matriculating in engineering courses as well as the textile courses offered at NBIT. Membership in the fraternity requires that a student be enrolled in any course of study here at Tech and maintain an average standing in his class. Many of the engineering students have taken advantage of the facilities of our new and beautiful Fraternity House located at 54 Campbell Street. Visitors to the Fraternity House any school evening will invariably find groups of students involved in problems ranging from Calculus and Physics to Weave Formation and Fabric Analysis.

KAPPA

SIGMA

PHI

Kappa Sigma Phi Sorority started off this year by initiating five new members at an Initiation Banquet at the Cathay Temple. In November the sorority put on a faculty luncheon which was enjoyed by all who attended. A "White Christmas Dance" was also sponsored in conjunction with Phi Psi Fraternity. One of the more charitable affairs sponsored by the sorority was in making a needy family a great deal happier at Christmastime by donating presents and other Yuletide pleasures.

The officers of the sorority are Gabrielle Cayne, president, June Brownell, vice-president, Joyce Dixan, secretary, and Janet Clifford, treasurer.

The Student Affiliate branch of the American Institute of Electrical Engineers, recognized as such on Feb. 2, 1956, is an organization designed to broaden the student's acquaintances with the engineering world outside the classroom. Among its major objectives are: to provide opportunities for the students to participate in independent functions brought about by their own initiative; to foster those qualities needed by the engineer which are not fully cultivated in the classroom; to provide an organization in which the technical developments and ideas of students in their academic years can receive recognition. Training the student in strengthening his social, technical, and literary bonds with his classmates, instructors, and with graduate engineers, and developing some of his administrative qualities are not only encouraged by industry but also by the branch at New Bedford Institute of Technology.

The activities of the organization usually include one or two field trips, an annual lecture series at Providence, some interesting films, and this year a dance co-sponsored by the Mechanical Engineering Club. Two films have already been viewed, one of which was the installation of a 132 Kv. Under-Water power cable between Vancouver Island and the British Columbia mainland.

The student branch is open to any students of the Institute, but only the Electrical Engineering students may become national members.

Univets is an organization which furthers the re-adjustment of Korean veterans to college life. The Univets also offers veterans a social life consisting of people in his own age group and with similar interests. This year the club opened their social season with a stag open house party which was met with a great deal of enthusiasm. Their second event was the annual Veterans' Day Dance which offered much in the way of entertainment to all who attended.

The Univets attempted many civic projects this year. A committee was sent to the Board of Health Commissioner to inquire about polio and flu shots for the student body of N.B.I.T. Another project completed was a trip to the mayor's office to propose a safety walk between the new and old buildings for the students. The Univets are always ready and eager to take action for the benefit of all those who attend Tech and is a worthy organization for the serious minded veteran.

UNIVETS

This chapter is a student unit of the National Organization whose student membership is open to students preparing for a career in some phase of textile chemistry. This club has been introduced only recently in the school, but has found much enthusiasm. It holds its own meetings regularly and also participates in the activities of the regional section of the parent organization. Their only school function of the year was a very successful dance which was unusually well attended.

The Newman Club is a Catholic organization formed to promote Catholic action on a college level. The club is affiliated with the National Federation of Newman Clubs. This school organization has been very active throughout the past year. The Newman Club's first endeavor was an extremely successful Communion breakfast followed by an interesting speech given by an Army Chaplain. Throughout the year a series of informative lectures on Catholic dogma were given. As the first social event to celebrate the end of Lent, a Post-Lenten Dance was sponsored by the group. Father Hagan is Acting Chaplain and Professor Jahn is Faculty Advisor.

PROTESTANT FELLOWSHIP

The Protestant Fellowship is one of the newer organizations at New Bedford Tech having been organized only last year. The leadership is under Mr. Clifford Beck's direction, as advisor of the group, while the four officers are June P. Brownell as President, Allan B. Collinge and Louis H. Skinner sharing the office of Vice-President, and Judy Morton, Secretary.

The aim of the group is to bring about Christian Fellowship through worship, recreation, cultural enrichment, and social activities. Worship is attained through varied monthly meetings held on Sunday nights followed by recreation of different types.

A few of the high spots of the group this year would be the enlightening discussions with Rev. Gene Landry, who is the spiritual advisor of the group, the showing of the film "Martin Luther", the quiet retreat to Camp Clark, and the charity basketball game the fellowship sponsored to benefit the Standard-Times Neediest Families Fund.

The Collegians is the name of the newly formed glee Club at N.B.I.T. As yet the group is quite small, but their lack of quantity is compensated for by their excellent quality. The Collegians' first appearance this year was for the Canterbury Club of Grace Episcopal Church where they were received enthusiastically. The glee club presented an entertaining Christmas performance at school before the holidays, and also represented the school at Music Week. The group's president is Louis Skinner and their able accompanist is Richard Amerad. The Collegians is a young group, but their plans for the coming year indicate a successful future.

TECH TALK

The 1957-58 year has brought many changes to the official student publication of New Bedford Tech. An enlarged staff and increased efficiency has enabled Tech Talk to make its greatest increase in publication ever.

Eleven issues were published in this, the fifth volume, compared with six issues in volume four. This increased number of issues has enabled the staff to give better coverage to general school news. It has also allowed an increase of sports and student activities coverage. Scores and highlights of all soccer, basketball, and baseball games and tennis matches were published. In this volume, the activities calendar was permanently established. One issue was published especially for Tech's open house in February. Another, published in April, was devoted entirely to original student humor. Again as in past years, advertising copy and revenues were increased with the help of the staff advertising men. Photographic quality was improved by the efforts of veteran photographers. Tech Talk's new office is one of the most important changes of the year. The increased available office space has speeded up typing and layout work making shorter copy working time. Experience tells in the quality of Tech Talk as the newspaper increases in age. Improvements in layout, content, and coverage are increasing over the years as each staff hands down to the next the experience acquired in their tenure. We have benefited from the improvements of last year's staff and build on those improvements. Tech Talk has come far in its scant five years of existence.

VATROLITE® — Use this powerful concentrated reducing agent for brighter vat dyed colors on cotton, linen and rayon ... for faster, cleaner stripping results on silk, cotton and rayon.

DISCOLITE® — A concentrated reducing agent, highly stable at high temperatures, outstanding for discharge and vat color printing. Employed successfully wherever the reducing agent must dry into the fabric and retain its reducing power.

PAROLITE® — A dust-free white crystalline reducing agent. Soluble, colorless, excellent for stripping wool piece goods and rugs, shoddy, acetate or nylon fabric.

... 13 WAYS
TO BETTER TEXTILES!

NEOZYME® — Concentrated low temperature desizing enzyme. Removes starch and gelatine. Excellent for eliminating thickeners from printed goods at low temperatures.

NEOZYME® HT — Concentrated high temperature desizing enzyme. Removes both starch and gelatine. Suitable for continuous pad-stream method. Remarkable stability at very high temperatures.

NEOZYME® L & NEOZYME Special — Liquid desizing enzymes in two degrees of concentration. Remarkable stability at very high temperatures.

VELVO SOFTENER #25 — Economical creamy white paste softener derived from highly sulphonated tallows. Gives softness and body without stiffness or affecting whites.

DISPERSALL — Effective retorder for dyeing vat colors, dispersing and leveling qualities, for dyeing naphthol and vat colors, useful in wool and acetate dyeing. Valuable auxiliary in stripping vat colors, naphthols.

NEOWET — Permits effective wetting at all temperatures — particularly useful with enzymatic desizing agents. No reaction to soft or hard water. Not affected by dilute acids or alkalis. Non-ionic. Not suitable for use in peroxide baths.

NEOWET X — Effective wetting agent at all temperatures from cold to boiling. Does not inhibit enzyme action in desizing both. Good for use with resin finishes, and hydrogen peroxide bleaching liquors. Good rewetting properties. Anionic.

CASTROLITE® — A highly sulphonated castor oil used as a staple penetrant for dyeing or kier boiling in leading textile mills. Still used extensively in finishing.

VELVORAY® — A blend of sulphonated vegetable oils and selected fats for a superior, non-foaming finishing oil. High in combined SO₃ and stability. Excellent for compressive shrinking, will not smoke off at high temperatures.

P.S. ... A centrally located plant ... strategically placed warehouses ... and Royce's own fleet of trucks ... mean fast, dependable delivery—always!

CONGRATULATIONS

to You who are about to enter the Textile Industry!

Your interest in textiles together with your background of study and training are essential elements in building the solid foundation for a successful career.

The Textile Industry is a basic industry — and a continuing one. It is an industry which provides great opportunity for initiative, growth and satisfying personal achievement so important to the development of your career.

You are welcome indeed. Your energy, your eagerness and your skills are all needed in helping the industry advance to new levels of achievement.

May every success be yours in the industry which will play such an important part in your future — and in ours.

REVERE TEXTILE PRINT ROLLS

A New Bedford Product Famous For a Hundred Years

"For more than a century the New Bedford Division of Revere Copper and Brass Incorporated has been making textile print rolls. As a result of this long experience the Revere organization is in a unique position to know and understand practical textile printing problems and how to meet them with rolls best adapted to give efficient, economical service.

"Revere specialists in this field are available to assist you in obtaining the type of rolls best adapted to serve your individual requirements."

For a Quality Finish Use **DIASTAFOR** Desizing Agent

Wherever quality of finish and process economy are essential, you will most often find Diastafor used in the desizing operation.

Finishers and dyers insist upon Diastafor, accepted and respected by the textile industry for more than 45 years.

Because of its thermostability, Diastafor has a rapid desizing rate at high temperatures up to 180° — 200°F .

Diastafor is available in several strengths to meet your individual needs.
